Steps to be followed:

**1. Importing Clips:**

- Open your editing software.
- Click on "Import".
- Select your video clips.
- Click "Import" to add them to your project.

**2. Previewing Footage:**

- Select a clip.
- Press play to watch it.
- Note the parts you want to keep or remove.

**3. Trimming Clips:**

- Find the start of the segment you want.
- Trim from the start to the end of the segment.
- Remove any extra footage.

**4. Arranging Clips:**

- Drag trimmed clips onto the timeline.
- Arrange them in the order you want.
- Ensure smooth transitions between clips.

**5. Fine-Tuning:**

- Review the sequence.
- Adjust transitions if needed.

**6. Exporting the Edited Footage:**

- Click on "Export".
- Choose settings like resolution and format.
- Export the final video.

**THANK YOU!**
